## GS-12ME 12" Glue Spreader

### Features:

- Our entry level table-top glue spreader is designed for water-based woodworking glues.
- Glue is applied to the bottom edge of the stock when the stock is passed by hand across the roll.
- Use the adjustable stainless steel doctor blade to adjust the glue spread thickness.
- The high-quality 6" diameter, 12" wide grooved rubber roll for durability usage.
- Removable stainless steel glue pan, doctor blade and glue roll assembly for quick and easy clean-up.
- Floor stand, air regulator & air hold down cylinder.
- Aluminum rollers extension frame & 4 aluminum rollers included on floor model GS-12TR.
- The electrical power requirement is 110 volts, single-phase.
- Other sizes available.
