## BR-120DECT Automatic Double End Chucking & Threading Machine

(Training and installation, tooling & rigging are optional)  
(Customer is responsible for local regulations and connecting utilities)

### Features:

- This automatic machine is designed for knurling operations and a round or taper section at the end of rod on the turned end to achieve secure jointing effect.
- The machine is a high production, automatic unit and is pneumatically operated with air clamp by a foot switch for convenient operation.
- The machine is supplied with one knurling cutterhead & one round or taper cutterhead as standard.
- Custom sizes of knurling or round or taper cutting head are supplied as optional.
- Powerful industrial motor for durability usage.
- Precision sealed long-life bearing.
- Heavy sheet metal stand.
- Automatic feed magazine for mass production and automatic carry out the stock and drops it.
- Feed loader can be adjusted suitable for various diameters of stock. Saw head slides on precision machined dovetail ways, saw blades are perfect square to stock, that enables cut-off surface straight and smooth.
- Stock rest can be adjusted to suit for various cylindrical stock diameters or tapered diameters.
