EGS-947 10" x 48" Oscillating Edge Sander

Features:

- Sandpaper automatically oscillates up & down so it will not overheat to get longer life usage and better finish result.
- 8" x 20" end table mounted at left side of the machine to use as contour sanding.
- Heavy gauge sheet metal cabinet stand and table for heavy work.
- The height of front & back table is adjustable for 5".
- Easily adjustable belt tension device.
- Two 47" W x 11-3/4" D working tables can be tilted up to 45 degrees reducing material burning and promotes longer belt life.
- The graphite pad lubricates the sanding belt and allows the belt to run cooler and smoother.
- All sealed long-life ball bearings and rubber contact motor pulley.
- Several typical profile blocks can be used for the edge profile sander.
- Powerful industrial motor for durability usage.
- Overload protect magnetic switch.
