EGS-108 6" X 108" OSCILLATING EDGE SANDER MACHINE

Feature:

- Sand paper automatically oscillating so it will not over heated to get longer life usage and better finish result
- End table mounted at left side of the machine to use as contour sanding.
- High gauge metal cabinet stand and cast iron table for heavy work.
- The height of table is adjustable.
- Easily adjusted belt tension device.
- Sanding head can tilt for angle sanding, table can raise one end up or down, reduces material burning and promotes longer belt life.
- The graphite pad lubricates the sanding belt and allows the belt to run cooler and smoother.
- All sealed long-life ball bearings and rubber contact motor pulley.
- Several typical profile blocks can be used for the edge profile sander.
- Powerful industrial motor for durability usage.
- Overload protect magnetic switch.
