SD-HC350 Horizontal Curve Sander

Option:

- SD-12SD 12" SPONGE SANDING DRUM

Features:

- The horizontal type curved sander is used for sanding relatively light workpieces than vertical type curved sander.
- Ordinarily used for sanding curved surface or irregular contour stocks, such as chair legs, etc.
- Sanding is semi-automatic feeding the workpiece by AC motor, drives feed roll smoothly for faster production.
- Feed speed is infinitely variable speed adjusted for best finish results.
- Easily adjustable sand belt tension device.
- Sponge drum may be replaced with a brush wheel for thoroughly cleaning burrs, and fine finish sanded surfaces.
- Sponge drum can be also replaced with an air or rubber drum for heavy sanding operations.
- Available with sponge drums by hardness 10° ~ 15°.
- Powerful industrial motor for durability usage.
