SET-46TS 4' 6 Heads Through Feed Double End Tenoner
SET-86TS 8' 6 Heads Through Feed Double End Tenoner

Optional: Feed Magazine; Auto Transfer Line (4 ft x 4 ft) Transfer Table

Features:

- The automatic high-speed through feed device allows for perfect finishing at speeds ranging from 12 ~ 52 FPM.
- Suitable for mass production of woodworking factory for processing of double end cutting, tenoning, grooving, moulding, and sanding.
- Saw, Shaper, Jump Shaper: Total 3 stations at both sides.
- Reversed direction cutting jump shaper head with sensor for automatic move in and out for perfect cutting to prevent tearing at end edge.
- It is a powerful machine great for heavy-duty production.
- In addition to the double end cutting, all the settings and other processing can also be executed with high accuracy.
- Since the machine is so versatile, we believe it should be one of the most satisfactory equipment for bulk production lumber-processing factories.

- The specially designed numeric controller allows quick setting of sizes, for the tolerance within 0.004”.
- Variable speed, through feed, wide rubber pad, spring loaded dots conveyor for the best finish selections.
- Heavy-duty pressure rolls at top of wide width conveyor to hold the material tight to prevent sliding during the cutting process.
- Shaper head can be moved up & down, forward & backward.
- Equipped with industrial motor for full power cutting capacity.

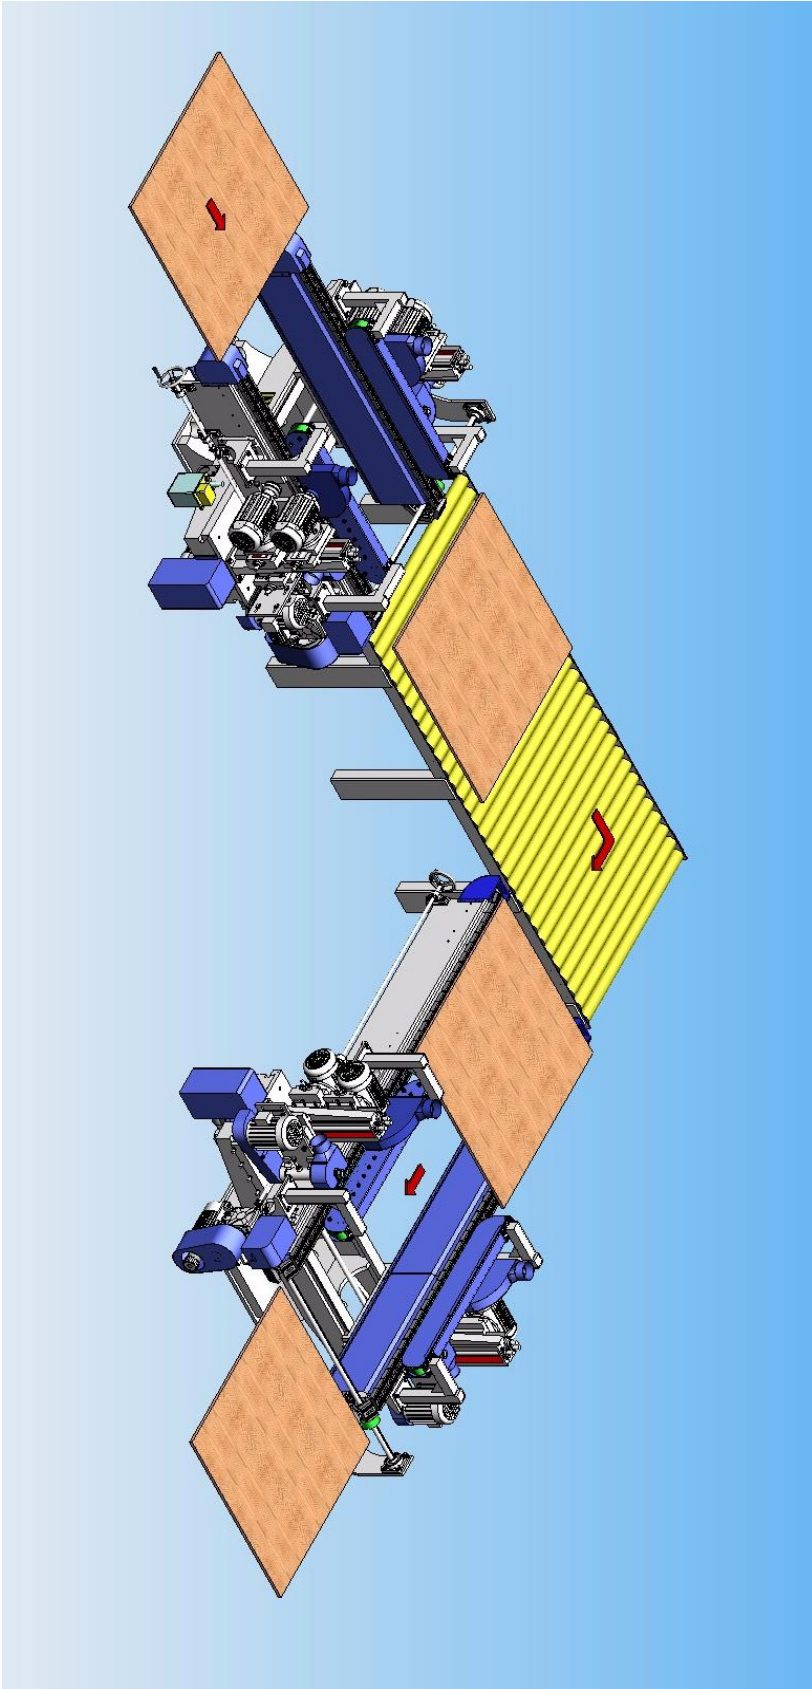

SPECIFICATIONS	SET-46TS / 86TS
Max. Working Thickness	4”
Max. Working Length	48” / 96”
Miter Saw Blade (Diameter)	10” x 1”
Grooving Saw Blade (Diameter)	10” x 1”
Shaper Cutter (Diameter)	6” ~ 8” x 1”
Feed Speed	12’ ~ 52’ Variable
Motor	3 PH, 220/440 V
Scrolling Saw	2 HP x 2
Trim Saw (Optional Jump Shaper)	3 HP x 2
Vertical Shaper	5 HP x 2
Sanding	---
Feeding	1 HP x 1
Width Setting	½ HP x 1
Machine Size (L x W x L)	8’ / 12’ x 8’ x 6’
N.W.	2800 / 3100 LBS
G.W.	3400/ 3700 LBS

Optional: Jump Shaper Cutter Head

Auto Transfer Line (4 Side)

Optional Auto Feed Magazine
